

# Improving Outcomes Is Something We Take Personally

While receiving care at our center, patients are able to dialyze in house where treatments are shorter and more frequent helping to avoid the burden of tiresome travel to an outpatient center. Our interdisciplinary team provides for every aspect of your treatment and coordinate with the dialysis team to help improve health through dietary, medications and physical, occupational and speech therapy recommendations to making the most of the rehabilitation stay.

## Dignity and Quality of Life are Non-Negotiable, Call Us Today.

Please take full advantage of this service, ask the case manager of the hospital that is treating your family member to contact our center to coordinate admission, stop by for a tour and meet our team or call for more information about our in-house hemodialysis program.

## *In-House Hemodialysis*

Choosing the Road  
to Recovery...

# Receive Dialysis Without Leaving the Center

Our Center has partnered with Dialyze Direct to provide staff assisted home hemodialysis treatments in our Nursing & Rehabilitation Center. Using the most advanced NxStage equipment, the treatments are tailored to help patients get their most of their time at the center. Research shows that patients being dialyzed in both shorter more frequent sessions have significantly improved outcomes: increasing fluid removal, reducing recovery times, managing anemia better, reducing blood pressure, medications and reducing stress on the heart. These improvements have enhanced quality of life and help our patients maximize your time at the center.

## Improving Outcomes is Something We Take Personally

While receiving care at our center, patients are able to dialyze in house where treatments are shorter and more frequent helping to avoid the burden of tiresome travel to an outpatient center. Our interdisciplinary team provides for every aspect of your treatment and coordinate with the dialysis team to help improve health through dietary, medications and physical, occupational and speech therapy recommendations to making the most of the rehabilitation stay.

## A Proven Model So Patients Can Live With Dialysis Treatment

Partnering with Dialyze Direct we are invested in one thing, improving the quality of life for our patients. Everything about how we deliver dialysis is informed by this priority and our focus is on positive clinical and therapy outcomes. This Unique model of hemodialysis produces quality results for our patients. Our patients didn't choose to require dialysis but they can choose how they receive it, and that can make all the difference.

## A Return To Living Life on Our Patients Own Terms

Quality results are only achievable through the shorter, gentler and more tailored treatment model of home hemodialysis. Treatments typically last two and a half hours and are offered daily or five times each week (pursuant to the physician's orders) and recovery times can take just thirty-minutes as compared with traditional dialysis which can have up to nice hour recovery periods. This allows our patients to reclaim up to twenty-hours a week of additional time for therapy, quality time with family visits and daily activities in our center.

## The Benefits That Make Us Better Make You Stronger

Eliminate time, stress and energy spent traveling to Outpatient Treatment Facilities for dialysis.

No More bagged lunches at the Outpatient Facilities.

Experience the difference of better control of hypertension and anemia, less fatigue,, less medications, fewer dietary restrictions and less hospitalizations.

Treatments are delivered by highly trained professionals using separate dialysis machines for each patient.

## Treatment Centered On Our Patient's Needs

The stress often associated with traditional Hemodialysis provided by an offsite Out Patient Treatment Facility may be minimized by the many benefits of receiving daily dialysis in our Center. Our partnership with the team at Dialyze Direct is designed to enhance the quality of life for our patients while providing dialysis in a caring, familiar and secure environment.
